Teamspeak 3

We have updated from Teamspeak2 to the newly released Teamspeak 3.

Teamspeak 3 is a huge improvement from ts2. Better voice quality, more secure, and file sharing as well. You can download the ts3 client from teamspeak.com or from our web download page via this link [|PX|TS3 client](#)

The connecting i.p. will still be the same. However, since they have been sold out of microphones in most of canada and the US the last year, the i.p. is 208.53.138.5.
